

# Thermal Spa Treatment and Improvement of Primary Ciliary Dyskinesia

NCT07029594

---

Status	RECRUITING
Phase	Not Applicable
Sponsor	Association Francaise pour la Recherche Thermale
Enrollment	35 participants

## Key Eligibility Criteria

---

### Inclusion (6)

- Confirmed diagnosis of Primary Ciliary Dyskinesia (PCD) based on electron microscopy analysis of ciliary ultrastructure and/or genetic testing (i.e., two unambiguous mutations in genes known to be involved in PCD, particularly in cases with normal ciliary ultrastructure \[~20% of patients\], atypical ultrastructural findings, or suggestive symptoms in a family with a known causal gene).
- Age over 18 years.
- Stable maintenance treatment for at least 1 month prior to inclusion.
- Performance Status (PS) d 1.
- Patient has received the study information sheet and signed the informed consent form.

... and 1 more (see full listing online)

### Exclusion (21)

- Participation in a thermal spa treatment within the past year.
- Severe general health deterioration or debilitating conditions.
- Severe or recent heart failure.
- Labile hypertension.
- Venous insufficiency or deep vein thrombosis within the past 3 months.

... and 16 more (see full listing online)
