

Implementing Depression and Adherence Treatment

NCT07032363

Status	RECRUITING
Phase	Not Applicable
Sponsor	University of Miami
Enrollment	10 participants

Key Eligibility Criteria

Inclusion (6)

- Clinics are eligible if they provide HIV primary care via the City of Cape Town (CoCT) Department of Health
- Clinics will be assigned to the study upon notice of funding and before start up.
- Although the unit of randomization is at the clinic level, the study will be looking at adult patient level data at each clinic. All patients engaged in care at one of the 10 primary care/HIV treatment clinics in the study will be included if they:
- Are 18 years of age or older and
- Have a detectable HIV viral load (operationalized as the lower limit of detection on the standard test is used at the local clinic), or presumed detectable viral load per clinic standards

... and 1 more (see full listing online)

Exclusion (1)

- Children below the age of 18 will not be included in the proposed study for adults.
