

An Investigation to Evaluate Wearing Properties of Three Different Investigational Devices

NCT07034014

Status	RECRUITING
Phase	Not Applicable
Sponsor	Molnlycke Health Care AB
Enrollment	35 participants

Key Eligibility Criteria

Inclusion (4)

- Participants who are capable and willing to comply with protocol visits, assessments, and instructions.
- Participants must be in general good health with healthy and intact skin in the test area (as determined by the investigator based on medical history and examination of the application sites).
- Minimal hairiness at the back (location of the application sites).
- Signed written informed consent.

Exclusion (22)

- Known allergy/hypersensitivity to the dressing or its components.
- Participants with any features at the application sites will be in contact with the adhesive surface of the dressing, and could influence the investigation.
- Participants not willing to avoid contact of the application sites with water in the morning prior to dressing application and throughout the entire course of the study.
- Participants not willing to avoid applying any detergents to the application sites in the morning prior to dressing application and throughout the entire course of the study.
- Participants not willing to avoid the use of leave on cosmetics such as creams/lotions and sunscreens at the application sites 3 days leading up to dressing application and throughout the entire course of the study.
