

Evaluation of the Fetal Response to Intrapartum Digital Fetal Scalp Stimulation to Identify Intrapartum Fetal Hypoxia.

NCT07035028

Status	RECRUITING
Phase	Not Applicable
Sponsor	Instituto de Investigación Sanitaria de la Fundación Jiménez Díaz
Enrollment	182 participants

Key Eligibility Criteria

Inclusion (5)

- Women with singleton pregnancy.
- Cephalic presentation.
- Gestational age greater than or equal to 37 weeks.
- Pathological cardiotocographic record according to the criteria published by FIGO and with indication to perform a second-line complementary test, in our case a gold standard test of fetal scalp blood FBS, which confirms or not if there is a risk of loss of fetal well-being and the need for fetal extraction.
- Signature of HIP and CI for data collection.

Exclusion (6)

- Under 18 years of age.
- Contraindication for FBS
- Uterine dilatation that does not make FBS possible.
- HIV
- Hepatitis

... and 1 more (see full listing online)
