

An Open-Label, Single-Arm Exploratory Clinical Study of Everolimus for the Treatment of Vascular Malformations

NCT07037238

Status	RECRUITING
Phase	Phase 2
Sponsor	Xuanwu Hospital, Beijing
Enrollment	10 participants

Key Eligibility Criteria

Inclusion (9)

- Patients aged e18 and d65 years;
- No gender restrictions;
- Diagnosed with vascular malformation by MRI;
- No major surgery within the past 3 months;
- Able to swallow and retain oral medication, with no significant gastrointestinal abnormalities that may affect drug absorption, such as malabsorption syndrome, intestinal obstruction, or extensive gastrointestinal resection;
- ... and 4 more (see full listing online)

Exclusion (19)

- Diagnosed with Hereditary Hemorrhagic Telangiectasia (HHT), Arteriovenous Malformation (AVM), or PTEN Hamartoma Tumor Syndrome (PHTS);
- Patients who have previously received any of the following treatments after birth: participation in other interventional clinical trials targeting cerebral cavernous malformations (CM);
- Presence of malignant tumors currently or within the past three years, except for curatively treated non-melanoma skin basal cell carcinoma, ductal carcinoma in situ of the breast, or cervical carcinoma in situ;
- Unable to undergo MRI scans and/or have contraindications for MRI (e.g., interference from prosthetics, orthodontic devices, etc., affecting target lesion volume analysis on MRI);
- Modified Rankin Scale (mRS) score of 5, respiratory failure, or currently experiencing severe bleeding requiring life-support treatment;
- ... and 14 more (see full listing online)

Locations (1 total)

the Department of Neurosurgery, China International Neuroscience Institute, Xuanwu Hospital, Capital Medical University, Beijing, China
