

# HCMR Re-Imaging Study

NCT07054073

---

**Status** RECRUITING  
**Sponsor** Christopher Kramer  
**Enrollment** 314 participants

## Key Eligibility Criteria

---

### Inclusion (12)

- Patients in the original HCMR cohort with:
- Obstructive HCM
- Males and females between 18 and 65 years of age
- BMI  $\leq$  35 kg/m<sup>2</sup>
- LVOT-G at entry as follows:  
... and 7 more (see full listing online)

### Exclusion (5)

- Paroxysmal atrial fibrillation or flutter documented prior to entry.
- Paroxysmal or permanent atrial fibrillation requiring rhythm restoring treatment (eg, direct-current cardioversion, ablation procedure, or antiarrhythmic therapy)  $\geq$  6 months prior to entry. (This exclusion does not apply if atrial fibrillation has been treated with anticoagulation and adequately rate-controlled for  $\geq$  6 months.)
- History of syncope or sustained ventricular tachyarrhythmia with exercise within 6 months prior to entry.
- Pregnancy due to potential risk of gadolinium to the fetus
- Patients with a pacemaker that are pacemaker-dependent as they cannot undergo MRI

## Locations (8 total)
