

# SGLT2i in Kidney Stones

NCT07055282

---

<b>Status</b>	RECRUITING
<b>Phase</b>	Early Phase 1
<b>Sponsor</b>	University of Chicago
<b>Enrollment</b>	32 participants

## Key Eligibility Criteria

---

### Inclusion (8)

- Calcium phosphate (CaP) stone participants:
- Age 18-70
- History of at least one calcium phosphate (hydroxyapatite) stone
- Defined as at least 50% of stone material on most recent stone analysis
- Calcium oxalate (CaOx) stone participants:
- ... and 3 more (see full listing online)

### Exclusion (6)

- History of primarily brushite, uric acid, cysteine, or struvite stones
- History of severe acid-base abnormality, very low (less than 100mg/day) or very high (greater than 1500mg/day) urine citrate
- Participants who cannot stop diuretic medication or alkali supplementation for the course of the study period
- Use of drugs that can directly affect proximal tubule function (e.g., topiramate)
- Diagnosis of complete distal renal tubular acidosis
- ... and 1 more (see full listing online)
