Phase	Not Applicable
Sponsor	Hyfe Inc
Enrollment	20 participants

Key Eligibility Criteria

Inclusion (7)

- Age 21 or older.
 - Currently suffering from a cough that started at least 8 weeks ago that is largely unproductive (i.e., at least 50% of the time the cough produces zero mucus that needs to be spit out or swallowed).
 - Normal chest X-ray or chest CT scan at some point that was prescribed specifically for their cough.
 - At least one physician visit for cough with standard-of-care therapy but inadequate symptom relief.
 - Stability of treatment: willing to avoid new cough treatments during study or report changes if they occur.
- ... and 2 more (see full listing online)

Exclusion (12)

- Recent upper respiratory infection (past 4 weeks).
 - History of hemoptysis (coughing up blood) since onset of the current cough.
 - Current smoker (incl. vaping) of any substance.
 - e10consecutive pack-years smoking history within <10 years prior to screening.
 - Diagnosed with a chronic lung condition (COPD, emphysema, lung cancer, IPF, chronic bronchitis, asthma). Note: Suspected asthma without confirmed diagnosis or benefit from asthma therapy is not an exclusion.
- ... and 7 more (see full listing online)
