

Natural History Study of Inherited Retinal Diseases

NCT07085533

Status RECRUITING
Sponsor Zhongmou Therapeutics
Enrollment 200 participants

Key Eligibility Criteria

Inclusion (7)

- Color Perception and Communication Ability Participants must have the ability to verbally identify or describe colors and test stimuli. This requires adequate cognitive and communicative capacity to understand instructions and respond appropriately during color vision testing.
 - Diagnosis of Inherited Retinal Dystrophy (IRD Group Only) Participants assigned to the IRD group must have a confirmed clinical diagnosis of an inherited retinal dystrophy
 - No Evidence of Inherited Retinal Disease (Control Group Only)
 - Participants in the control group must have:
 - No known history or clinical evidence of inherited retinal degeneration
- ... and 2 more (see full listing online)

Exclusion (12)

- Non retinal causes of color vision loss
 - Optic neuropathies (e.g., optic neuritis, glaucoma related optic nerve damage)
 - Cortical vision impairments affecting color perception
 - Any other neurological or optic nerve pathology causing color vision deficiency
 - Psychological or cognitive conditions affecting color perception or communication
- ... and 7 more (see full listing online)

Locations (1 total)

Renmin Hospital of Wuhan University, Wuhan, China
