

Drug-Eluting Balloon Treatment vs. Guideline-Directed Medical Therapy for the Treatment of Lipid-Rich Plaques

NCT07107971

Status	RECRUITING
Phase	Not Applicable
Sponsor	Academisch Medisch Centrum - Universiteit van Amsterdam (AMC-UvA)
Enrollment	400 participants

Key Eligibility Criteria

Inclusion (3)

- Presenting with acute coronary syndrome (ACS);
- Successful PCI of a native coronary artery or major side branch;
- At least 2 native coronary arteries are accessible for invasive coronary imaging; i.e. not totally occluded and >2 mm and <6 mm reference vessel diameter.

Exclusion (8)

- Hemodynamically unstable (presence of cardiogenic shock, need for intubation, need for inotropes);
- Known hypersensitivity to paclitaxel;
- Procedural complications of the index PCI;
- Known renal insufficiency, i.e. eGFR <30 mL/min/1.73 m²;
- Hypersensitivity or allergy to contrast with inability to administer steroid and antihistamine premedication;
- ... and 3 more (see full listing online)
