

Non-invasive Diffusion-weighted Imaging With MRCP in the Diagnosis of Neoplastic Biliary Obstruction

NCT07108725

Status	RECRUITING
Sponsor	The General Authority for Teaching Hospitals and Institutes
Enrollment	100 participants

Key Eligibility Criteria

Inclusion (3)

- Adult patients (≥18 years) with clinically suspected biliary obstruction (e.g., jaundice, elevated liver enzymes, cholestasis).
- Patients who are scheduled for magnetic resonance cholangiopancreatography (MRCP) and have undergone conventional imaging [ultrasound or computed tomography (CT)].
- Patients who will undergo further invasive procedures, e.g., endoscopic retrograde cholangiopancreatography (ERCP), biopsy.

Exclusion (3)

- Patients with contraindications to magnetic resonance imaging (MRI) (e.g., pacemakers, metal implants).
- Patients who have previously undergone major biliary surgery or stent placement.
- Pregnant or lactating women.
