

"Airway Complications in Pediatric Patients With Tracheostomies: To What Extent Can Symptoms Identified by Caregivers or Pediatricians Serve as Predictors for Airway Complications Confirmed Through Surveillance Endoscopy?"

NCT07121517

Status RECRUITING
Sponsor Karolinska Institutet
Enrollment 100 participants

Key Eligibility Criteria

Inclusion (1)

- All children, with tracheostomy, under the age of 18, undergoing scheduled surveillance airway endoscopy in anaesthesia as part of their regular follow-up at the Long term Intensive Care unit (LIVA) at Karolinska University Hospital are eligible for inclusion. Patients may be included several times during the study period.

Exclusion (1)

- All patients undergoing airway endoscopy that is not part of the surveillance airway endoscopy program will be excluded. Thus, emergency endoscopies are not included in this study.

Locations (1 total)
