

# European Registry Study on Lymphatic Interventions

NCT07131293

---

Status	RECRUITING
Sponsor	Rigshospitalet, Denmark
Enrollment	500 participants

## Key Eligibility Criteria

---

### Inclusion (3)

- Patients of any age with a confirmed central lymphatic disorder, either in the context of CHD or as a primary lymphatic disorder, verified through lymphatic diagnostics (e.g. lymphatic imaging or relevant biomarkers).
- Patients who have undergone, or are undergoing, diagnostic lymphatic imaging and/or interventional procedures for their lymphatic disorder.
- Patients who are receiving, or have received, conservative (non-interventional) management for their lymphatic disorder.

### Exclusion (4)

- Patients with isolated peripheral lymphatic disorders not involving the central lymphatic system.
- Patients with acute postoperative iatrogenic chylothorax (<3-4 weeks duration and not requiring intervention).
- Patients without sufficient clinical documentation to confirm diagnosis, treatment, or follow-up.
- Patients who decline, or whose legal guardians decline, to provide informed consent (for prospective inclusion).
