

# Standardization of Spatial Neglect Assessment Tests

NCT07145970

---

|                   |   |
|-------------------|---|
| <b>Status</b>     | RECRUITING                              |
| <b>Phase</b>      | Not Applicable                          |
| <b>Sponsor</b>    | Assistance Publique - Hôpitaux de Paris |
| <b>Enrollment</b> | 210 participants                        |

## Key Eligibility Criteria

---

### Inclusion (5)

- Healthy volunteer attending the neurovascular department of Raymond-Poincaré Hospital
- Aged between 20 and 89 years
- Affiliated with a health insurance scheme
- French-speaking
- Has freely and knowingly expressed their non-opposition

### Exclusion (10)

- Known history of central neurological disease: stroke (ischemic or hemorrhagic), transient ischemic attack, encephalitis, multiple sclerosis, or epilepsy.
- Medical interview suggesting past central nervous system involvement: history of episodes such as sensorimotor deficits, dysarthria, aphasia, blurred or double vision, or positive symptoms such as visual or sensory hallucinations (e.g., paresthesias).
- Significant visual impairment - as judged by the examiner - in near vision despite correction, or monocular blindness. Specifically, inability to distinguish the targets with gaps in the example (pre-test) of the Apples Cancellation Test.
- Abnormal neurological examination:
- National Institutes of Health Stroke Scale (NIHSS) score  $\geq 0$
- ... and 5 more (see full listing online)

## Locations (1 total)
