

Azithromycin Versus Doxycycline in Hospitalized Adult Patients With Community Acquired Pneumonia Treated With Beta-lactams

NCT07164131

Status	RECRUITING
Phase	Phase 4
Sponsor	Mayo Clinic
Enrollment	1,120 participants

Key Eligibility Criteria

Inclusion (1)

- All adult patients (>18 years old) admitted with CAP and receiving a beta-lactam antibiotic plus a form of atypical coverage (azithromycin or doxycycline) in the ED within 12 hours of admission.

Exclusion (9)

- High clinical suspicion for Legionella pneumonia
- Allergy or contraindication to the use of either azithromycin or doxycycline (usual clinical practice)
- Antibiotics not for CAP
- Pregnant women (based on clinical assessment as part of standard of care)
- Severe CAP as defined by the ATS/IDSA criteria
