

R61/33 - VR Study Phase 4

NCT07169760

Status	RECRUITING
Phase	Phase 4
Sponsor	Rutgers, The State University of New Jersey
Enrollment	252 participants

Key Eligibility Criteria

Inclusion (6)

- Participants must meet DSM-5 criteria for ADHD
 - Between the ages of 18 and 25
 - Given high rates of comorbidities in college students with ADHD, participants who meet criteria for ODD, anxiety or depressive disorders on the diagnostic interview are not excluded
 - Participants must have an item mean score of ≥ 2.0 (often or very often) on the homework task specific version of the Adult Concentration Index (ACI), ensuring the presence of a problem in the mechanism being targeted in this study
 - The participant has to endorse a total of at least 5 symptoms in the ADHD inattention domain as currently present and impairing and at least 6 symptoms in the ADHD inattention domain as present and impairing during childhood
- ... and 1 more (see full listing online)

Exclusion (4)

- Whether primary or not, the comorbid presence of several other conditions will be exclusionary. This includes autism spectrum disorders, bipolar disorder, obsessive-compulsive disorder, active substance abuse, and other psychiatric conditions whose treatment precludes participation in the study.
- Students who do not meet criteria for ADHD are not eligible
- Students who are not in the specified age range are also not eligible to participate
- Students with a history of seizures are not eligible to participate given the use of VR
