

Prevalence of Pain in Mechanically Ventilated Patients in Intensive Care Units

NCT07182851

Status RECRUITING
Sponsor Centro Universitário Augusto Motta
Enrollment 370 participants

Key Eligibility Criteria

Inclusion (2)

- Participants of both sexes, aged 18 or over;
- Participants who are using invasive mechanical ventilation,

Exclusion (4)

- Participants undergoing treatment with neuromuscular blockers,;
- Participants with any condition associated with altered pain perception (e.g., Guillain-Barré Syndrome, SCI, etc.);
- Participants with any condition that would likely interfere with behavioral assessments of pain (e.g., decortication or decerebration posture)
- As the assessments will be carried out before and after the tracheal aspiration procedure, if the patient does not have objective criteria for tracheal aspiration, he/she will be excluded from the study, irrefutably preventing the procedure from being carried out without express need.
