

# A Study Testing How Well the Drug Extract of Ginkgo Biloba Leaves Tablets Works for People With Memory or Thinking Problems After a Stroke When Added to Standard Treatment

NCT07220538

---

<b>Status</b>	RECRUITING
<b>Phase</b>	Phase 4
<b>Sponsor</b>	Dr. Willmar Schwabe GmbH & Co. KG
<b>Enrollment</b>	400 participants

## Key Eligibility Criteria

---

### Inclusion (4)

- Male and female participants aged e 55 years who gave their informed consent.
- Non-disabling overt acute ischemic stroke (NIHSS (National Institutes of Health Stroke Scale) d 5, mRS (Modified Rankin Scale) d 2 at the day of screening) confirmed by magnetic resonance imaging, and at least 7 but no longer than 14 days before baseline.
- Cognitive impairment (MoCA (Montreal Cognitive Assessment)) total score (corrected) \< 23 for participants with up to 12 years of education, or MoCA total score \< 22 if more than 12 years of education).
- Sufficient Chinese language skills to understand and respond to all interview questions, complete questionnaires and undergo neuropsychological testing.

### Exclusion (14)

- Participation in another experimental drug trial at the same time or within the past 4 weeks before enrollment.
- Aphasia, dysarthria, apraxia or paresis of the dominant upper extremity, severe and insufficiently corrected loss of vision or hearing, severe language difficulties or any other disability that may prevent the participant from cooperating adequately in the trial or that may interfere with neuropsychological test performance.
- Pre-stroke cognitive impairment (16-item Informant Questionnaire on Cognitive Decline (IQCODE) score e 3.3), preexisting major neurocognitive disorder (e. g., dementia due to Alzheimer's disease, vascular dementia, dementia with Lewy bodies, frontotemporal dementia).
- Cardiogenic ischemic stroke, atrial fibrillation, or any other conditions that require the intake of anticoagulants.
- Conditions that require the administration of thrombolytics at day of Screening or Visit 1.
