

Non-Abstinence Outcomes in Methamphetamine Use Disorder

NCT07226596

Status	RECRUITING
Phase	Not Applicable
Sponsor	William Stoops
Enrollment	300 participants

Key Eligibility Criteria

Inclusion (7)

- be age 18 years or older;
 - self-report methamphetamine use in the week prior to screening;
 - provide a methamphetamine-positive urine sample at screening;
 - meet DSM-5 criteria for moderate-severe Methamphetamine Use Disorder (MUD);
 - be seeking treatment for their methamphetamine use
- ... and 2 more (see full listing online)

Exclusion (2)

- current or past medical or psychiatric illness (e.g., physical dependence on any drug other than buprenorphine requiring medically managed detoxification, unstable angina, uncontrolled cardiac arrhythmia, aortic stenosis, self-reported compromised immune function, severe diagnosis for a SUD other than MUD or treated OUD) that would interfere with study participation in the opinion of the study physicians
- poor venous access precluding blood draws

Locations (1 total)
