

# Intravitreal (IVT) Pozelimab for Geographic Atrophy (GA) in Adult Participants

NCT07230834

---

Status	RECRUITING
Phase	Phase 1
Sponsor	Regeneron Pharmaceuticals
Enrollment	54 participants

## Key Eligibility Criteria

---

### Inclusion (3)

- Study eye with diagnosis of GA of the macula secondary to AMD, as determined by the investigator
- Study eye with total GA area measuring approximately one disc area or greater in size (2.5 mm<sup>2</sup> or larger) at screening, as determined by the Central Reading Center (CRC), as described in the protocol
- Best-Corrected Visual Acuity (BCVA) of 60 letters or worse using the Early Treatment Diabetic Retinopathy Score (ETDRS) charts (Snellen equivalent of  $\sim$  20/63) in the study eye at screening and baseline visit

### Exclusion (6)

- GA (macular atrophy) in either eye due to causes other than dry AMD
- History or current evidence of macular neovascularization and/or retinal exudation in either eye
- Concurrent eye disease (elevated Intraocular Pressure (IOP)  $>$ 25mm Hg, diabetic retinopathy, ocular infections/inflammation)
- Prior or current intravitreal (IVT) treatment of any kind for any indication in either the study or fellow eye, except complement inhibitor therapy for GA, as long as last dose was  $\geq$  3 months prior to screening
- Any prior systemic treatment for dry AMD, except oral supplements or vitamins
- ... and 1 more (see full listing online)
