

GEN-FPF: Genetic Exploration of Familial Pulmonary Fibrosis

NCT07251725

Status	RECRUITING
Sponsor	Fondazione IRCCS Policlinico San Matteo di Pavia
Enrollment	126 participants

Key Eligibility Criteria

Inclusion (13)

- Diagnosis of Familial Pulmonary Fibrosis (FPF):
 - At least two individuals from the same family (first-degree relatives) diagnosed with pulmonary fibrosis based on clinical, radiological, or histopathological criteria (e.g., HRCT pattern consistent with usual interstitial pneumonia, UIP).
 - Definite or probable FPF diagnosis, according to international classification criteria and verified family history of disease.
 - Age:
 - Adults aged 18 years or older at the time of enrollment.
- ... and 8 more (see full listing online)

Exclusion (6)

- Non-Familial Pulmonary Fibrosis:
 - Individuals with isolated, sporadic pulmonary fibrosis (without a family history) who are not part of the defined IPF control group.
 - Other Significant Pulmonary Diseases:
 - Presence of pulmonary diseases unrelated to fibrosis (e.g., chronic obstructive pulmonary disease, asthma, cystic fibrosis, or active pulmonary infection).
 - Refusal or Withdrawal of Consent:
- ... and 1 more (see full listing online)
