

Effect of Hybrid Functional Electrical Stimulation and Augmented Reality-Based Gait Training on Gait Parameters Among Incomplete Spinal Cord Injury Patients

NCT07263581

Status	RECRUITING
Phase	Not Applicable
Sponsor	Lahore University of Biological and Applied Sciences
Enrollment	70 participants

Key Eligibility Criteria

Inclusion (10)

- Diagnosed with incomplete spinal cord injury (ASIA Impairment Scale C or D)
- Neurological level of injury between T10 and L2
- Aged 18 to 45 years
- Medically stable with no acute complications
- Able to walk with or without assistive devices
- ... and 5 more (see full listing online)

Exclusion (6)

- Severe spasticity or contractures in the lower limbs
- Significant pain or joint instability in the lower limbs
- Presence of other neurological (e.g., stroke, multiple sclerosis) or musculoskeletal disorders
- Open skin lesions or ulcerations
- History of fractures or orthopedic surgery in the lower limbs
- ... and 1 more (see full listing online)
