

A Study to Investigate Sonrotoclax (BGB-11417) Plus Zanubrutinib (BGB-3111) Compared With Venetoclax Plus Acalabrutinib in Adults With Previously Untreated Chronic Lymphocytic Leukemia

NCT07277231

Status	RECRUITING
Phase	Phase 3
Sponsor	BeOne Medicines
Enrollment	500 participants

Plain Language Summary

This trial is comparing two new drug combinations for previously untreated chronic lymphocytic leukemia (CLL) — a slow-growing blood cancer. One combination uses sonrotoclax plus zanubrutinib, and the other uses venetoclax plus acalabrutinib, to see which works better.

****You may be eligible if...****

- You are an adult newly diagnosed with CLL that now requires treatment
- You have never received systemic treatment for CLL before
- Your disease is measurable on scan
- You are in reasonably good health (ECOG 0–2)
- Your bone marrow and organ function are adequate

****You may NOT be eligible if...****

- You have previously received any systemic treatment for CLL
- You have prolymphocytic leukemia or Richter's transformation (CLL that has changed into a more aggressive cancer)
- Cancer has spread to the brain or spinal fluid
- You have a history of a rare brain infection called PML
- You have uncontrolled high blood pressure or significant heart disease

Talk to your doctor to see if this trial is right for you.

Key Eligibility Criteria

Inclusion (4)

- Treatment-naïve (TN) adults with confirmed diagnosis of CLL which requires treatment
- Eastern Cooperative Oncology Group (ECOG) score 0, 1, or 2
- Measurable disease by Computer Tomography/Magnetic Resonance Imaging
- Adequate bone marrow and organ function

Exclusion (5)

- Previous systemic treatment for CLL
- Known prolymphocytic leukemia or history of, or currently suspected, Richter's transformation
- Known central nervous system involvement
- History of confirmed progressive multifocal leukoencephalopathy (PML)
- Uncontrolled hypertension or clinically significant cardiovascular disease
