

# Thrombolysis in Early Acute Ischemic Stroke Trial-Blood Pressure Management

NCT07279259

---

Status	RECRUITING
Phase	Phase 2
Sponsor	Shanghai East Hospital
Enrollment	340 participants

## Key Eligibility Criteria

---

### Inclusion (5)

- Age 18 to 80 years (inclusive);
- Patients with acute ischemic stroke;
- Planned to receive intravenous thrombolysis within 4.5 hours of onset;
- Elevated blood pressure: Before receiving intravenous thrombolysis treatment, blood pressure is elevated: systolic blood pressure  $\geq$  180 mmHg or diastolic blood pressure  $\geq$  100 mmHg (defined as two consecutive measurements within 2 minutes);
- Informed consent signed (or signed by a proxy).

### Exclusion (18)

- Intracranial hemorrhage is indicated on CT or MRI (including parenchymal hemorrhage, intraventricular hemorrhage, subarachnoid hemorrhage, subdural or epidural hematoma).
