

CHAPTER: Clonal Haematopoiesis Assessment: Prevention, Treatment and Research

NCT07313059

Status RECRUITING
Sponsor Clinical Hub for Interventional Research (CHOIR)
Enrollment 100 participants

Key Eligibility Criteria

Inclusion (4)

- Aged 55 years and above
- Confirmed CH or possible CH, with possible CH defined by:
 - a. Persistent, non-severe cytopenia, characterised by one or more of the following, present on at least 2 occasions, at least 4 months apart: i. Absolute neutrophil count (ANC) $\leq 1.8 \times 10^9/L$ ii. Haemoglobin (Hb) ≤ 115 g/L in females, ≤ 135 g/L in males iii. Platelet count $\leq 150 \times 10^9/L$
- Provision of written informed consent prior to any study-related assessments or procedures being carried out.

Exclusion (8)

- Severe cytopenia as defined by one or more of the following:
 - ANC $\leq 0.5 \times 10^9/L$
 - Hb ≤ 80 g/L
 - Platelet count $\leq 50 \times 10^9/L$
- Multilineage cytopenias:
 - ... and 3 more (see full listing online)
