

"Breathlessness Diagnostics in a Box" (BiaB) for Primary Care. A Multi-country Quality Improvement Project Using a Randomized Stepped-wedge Design

NCT07320703

Status	RECRUITING
Phase	Not Applicable
Sponsor	General Practitioners Research Institute
Enrollment	900 participants

Key Eligibility Criteria

Inclusion (2)

- Patient must be at least 18 years old at the time of signing the informed consent.
- Patients that present with undiagnosed dyspnea (breathlessness); or Patients who have existing diseases that could cause breathlessness, but have residual or increasing breathlessness that could be caused by other not yet detected diseases. Or HCP has doubts or requires additional tests to confirm diagnosis or to suspect new, parallel, diagnoses. For example, breathlessness in patients assessed within the framework of Cardiovascular Risk Management or for COPD monitoring

Exclusion (2)

- Acute worsening of previous diagnosed chronic disease where there is no suspicion of comorbidities (for example when a patient with clear COPD diagnosis has an exacerbation where typically the HCP will not perform additional tests).
- Inability to understand and sign the written consent form.

Locations (3 total)

- 15 primary care sites across the Netherlands, Groningen, Netherlands
- 15 primary care sites across Portugal, Porto, Portugal
- 15 primary care sites across Palma De Mallorca, Madrid, Murcia, Palma de Mallorca, Spain
