

# Implementation of an Algorithm- and Multi-professional Team-supported Strategy to Improve Lipid Management of Patients With Atherosclerotic Cardiovascular Disease

NCT07334834

---

<b>Status</b>	RECRUITING
<b>Phase</b>	Not Applicable
<b>Sponsor</b>	Colorado Prevention Center
<b>Enrollment</b>	100 participants

## Key Eligibility Criteria

---

### Inclusion (8)

- Provided informed consent
- Age  $\geq$  18 years inclusive at screening
- Documented atherosclerotic vascular disease including:
  - Coronary artery disease (prior revascularization, myocardial infarction, imaging evidence of coronary atherosclerosis)
  - Peripheral artery disease (prior revascularization, amputation, ankle: brachial index (ABI)  $\leq$  0.90, imaging evidence of extra-coronary atherosclerosis)
- ... and 3 more (see full listing online)

### Exclusion (3)

- Any reason that, in the opinion of the investigator, the patient would be unable to adhere to the protocol for the duration of the study (e.g. terminal diagnosis, metastatic cancer) or in whom participation might result in harm.
- Planned active titration of current lipid-lowering therapy
- Myocardial infarction or arterial revascularization within prior 30 days
