

Topical Cryotherapy and Keloid/Hypertrophic Scars

NCT07336368

Status	RECRUITING
Phase	Phase 3
Sponsor	Sonal Choudhary
Enrollment	30 participants

Key Eligibility Criteria

Inclusion (3)

- Adults (≥18 years) with keloids or hypertrophic scars already scheduled to receive intralesional triamcinolone (TAC) as part of routine care.
- At least one keloid or hypertrophic scar with two comparable regions (≥2 cm each) suitable for split-treatment.
- Able to provide informed consent and complete pain assessments in English.

Exclusion (3)

- Keloid or hypertrophic scar located on the face (except earlobes), excluded for cosmetic reasons.
- Prior treatment to the study-selected keloid/hypertrophic scar based on self-report.
- Inability to complete study assessments due to cognitive or language barriers.
