

Predicting the Need for Prolonged Respiratory Support in Neonates Delivered in a Lower-Level NICU Setting

NCT07344714

Status RECRUITING
Sponsor Mayo Clinic
Enrollment 500 participants

Key Eligibility Criteria

Inclusion (3)

- Both of the following:
 - Neonates born at 32 completed weeks gestational age or older whose deliveries are attended by the neonatal resuscitation team and for whom routine gastric suctioning is indicated
 - Neonates whose parents actively accepted or did not actively decline the Minnesota Research Authorization.

Exclusion (5)

- Any one of the following:
 - Neonates with known or suspected congenital anomalies
 - Neonates for whom only comfort measures are planned or possible at time of delivery
 - Neonates whose parents actively declined the Minnesota Research Authorization.
 - Neonates with other identifiable causes of respiratory distress including pneumothorax, meconium aspiration syndrome, or pneumonia.
