

# Augmentation of Peri-implant Keratinized Mucosa Using a Combination of Free Gingival Graft Strip With Platelet-Rich Fibrin

NCT07346391

---

Status	RECRUITING
Phase	Not Applicable
Sponsor	Nguyen Van Khuong
Enrollment	22 participants

## Key Eligibility Criteria

---

### Inclusion (5)

- Patients meeting the following criteria are eligible for the study:
- Prosthetic Phase: Patients scheduled for the prosthetic phase of dental implant treatment.
- Keratinized Mucosa: Keratinized mucosa height (buccal or lingual) of less than 2 mm around the implant.
- Systemic Health: Systemic health status classified as ASA I or II according to the American Society of Anesthesiologists classification.
- Oral Hygiene: Good oral hygiene, defined by a mean full-mouth plaque index (PII) of d 1.

### Exclusion (7)

- Patients meeting any of the following criteria will be excluded from the study:
- Systemic Conditions: Presence of systemic diseases or use of medications known to affect the oral mucosa or gingival health.
- Periodontal Health: Untreated periodontal disease and/or peri-implant diseases.
- Surgical History: History of mucogingival surgery at the intended surgical site.
- Pregnancy/Lactation: Pregnant or breastfeeding women.
- ... and 2 more (see full listing online)
