

Randomized Clinical Trial of Endovascular Therapy for Acute Ischemic Stroke With Occlusion of the M2 Segment of Middle Cerebral Artery

NCT07347665

Status	RECRUITING
Phase	Not Applicable
Sponsor	Hyogo Medical University
Enrollment	200 participants

Key Eligibility Criteria

Inclusion (10)

- Acute cerebral infarction
- Aged 18-84 years
- NIHSS score at admission ≥ 8
- Prestroke mRS scores of 0-1 (able to carry out all usual activities)
- Occlusion of the M2 segment of MCA on digital subtraction angiography
- ... and 5 more (see full listing online)

Exclusion (11)

- Occlusion of the anterior temporal artery, duplicate M1, or accessory M1
- Occlusion of multiple major intracranial arteries
- Difficulty in endovascular access due to tortuous vascular anatomy
- Significant mass effect with midline shift on CT (or MRI)
- Known allergy (more severe than skin rash) to contrast agents
- ... and 6 more (see full listing online)
