

CMR Prognostic Markers in Ischemic Heart Disease

NCT07351825

Status	RECRUITING
Sponsor	Chinese Academy of Medical Sciences, Fuwai Hospital
Enrollment	1,000 participants

Key Eligibility Criteria

Inclusion (4)

- Adults (≥18 years of age).
- Patients with ischemic heart disease, including prior or recent myocardial infarction, who underwent clinically indicated cardiac magnetic resonance (CMR) imaging.
- Availability of analyzable CMR images, including but not limited to cine imaging, late gadolinium enhancement (LGE), and parametric mapping sequences (T1 and/or T2 mapping), as applicable.
- Availability of baseline clinical data and longitudinal follow-up information.

Exclusion (3)

- Poor image quality or incomplete CMR data precluding quantitative analysis.
- Presence of other severe comorbid conditions expected to significantly affect survival or clinical outcomes.
- Missing key clinical outcome data during follow-up.
