

Early Clinical Outcomes of High-Purity Type I Collagen as a Biologic Reinforcement in Selected Hernia Repair Scenarios

NCT07360691

Status	RECRUITING
Phase	Not Applicable
Sponsor	Adichunchanagiri Institute of Medical Sciences, B G Nagara
Enrollment	25 participants

Key Eligibility Criteria

Inclusion (6)

- Age ≥18 years
- Ventral, incisional, umbilical, or para-umbilical hernia
- Contaminated or potentially contaminated surgical field
- Hernia repair following infected mesh explantation
- High-risk patients (diabetes, obesity, smoking, immunosuppression)

... and 1 more (see full listing online)

Exclusion (6)

- Clean, low-risk primary hernia suitable for synthetic mesh
- Large defects requiring permanent load-bearing prosthesis
- Generalized peritonitis or uncontrolled sepsis
- Known collagen hypersensitivity
- Pregnancy

... and 1 more (see full listing online)

Locations (1 total)
