

Study of DISC-0974-201 in Participants With IBD and Anemia

NCT07368972

Status	RECRUITING
Phase	Phase 2
Sponsor	Disc Medicine, Inc
Enrollment	21 participants

Key Eligibility Criteria

Inclusion (25)

- Participants must meet all the following criteria at screening (unless otherwise specified) to be eligible for enrollment in the study:
 - Aged e18 years at the time of signing informed consent.
 - Established diagnosis of IBD (CD, UC, or IBD-unclassified) based on documented findings on both endoscopy and histopathology.
 - Baseline endoscopy at screening with modified Mayo Score for UC and CDAI for Crohn's Disease to include mild disease as defined below:
 - a. CDAI of ≤ 220 and SES-CD of 0 to 6 (CD/IBD-unclassified) modified Mayo Score of ≤ 5 points and Mayo endoscopic subscore of 0 to 1 (UC/IBD-unclassified).
- ... and 20 more (see full listing online)

Exclusion (35)

- Participants meeting any of the following criteria at screening are not eligible for study enrollment:
 - Treatment within 2 days prior to screening with oral iron or iron-containing supplements. Participants may be considered for the study if they undergo a 2-day washout period prior to screening labs for oral iron or iron-containing supplements. Between screening and 2 days prior to Day 1 visit, participants may continue oral iron or iron-containing supplements at the discretion of the Investigator, but any study-related lab draws will require a 48-hour washout from oral iron.
 - Treatment within 30 days prior to screening with any of the following anemia treatments: blood transfusion, EPO-stimulating agent (ESA), or IV iron. Participants may be considered for the study if they undergo a 30-day washout period for ESAs or IV iron prior to screening labs.
 - Planned change in IBD directed therapy within 3 months of screening.
 - Moderate or severe IBD assessed during screening period. Defined as:
- ... and 30 more (see full listing online)
