

# Phase 1 Clinical Trial to Evaluate the Safety, Efficacy, and Pharmacokinetics of IPS101A in Parkinson's Disease Patients

NCT07371338

---

Status	RECRUITING
Phase	Phase 1
Sponsor	Innopeutics Corporation
Enrollment	6 participants

## Key Eligibility Criteria

---

### Inclusion (5)

- Subjects who have a diagnosis of Parkinson's disease that meets the UK Parkinson's Disease Society Brain Bank Clinical Diagnostic Criteria at the time of the Screening Visit.
- Male or female subjects aged 50 to 80 years (inclusive) at the time of providing written informed consent, with a documented diagnosis of Parkinson's disease.
- Subjects with a duration of Parkinson's disease of at least 10 years prior to the Screening Visit, based on medical history and/or medical records.
- Subjects with Parkinson's disease that is inadequately controlled despite all available standard-of-care treatments, including monotherapy or combination therapy, as determined by the Investigator.
- Subjects with a Hoehn & Yahr stage of 4 or 5 in the off state at the Screening Visit.

### Exclusion (6)

- Subjects with Parkinson's disease dementia (PDD) who meet the diagnostic criteria established by the Movement Disorder Society (MDS) Task Force, as determined by the Investigator at Screening.
- Subjects with a Korean Mini-Mental State Examination (K-MMSE) score  $\leq$  24 at the Screening assessment.
- Subjects in whom imaging findings suggestive of Parkinsonism-plus syndrome are observed on PET and MRI performed at the Screening Visit, as assessed by the Investigator and/or a qualified imaging specialist.
- Subjects who do not meet the diagnostic criteria for Parkinson's disease dementia but present with major visual hallucinations, as judged by the Investigator.
- Subjects with drug-induced parkinsonism, confirmed by clinical history and/or medical records, and determined by the Investigator.
