

# Impact of Hospital to Home: Optimizing Preterm Infant Environment for Surgical Neonates and Their Parents (H-HOPE)

NCT07372898

---

Status	RECRUITING
Phase	Not Applicable
Sponsor	Ann & Robert H Lurie Children's Hospital of Chicago
Enrollment	40 participants

## Key Eligibility Criteria

---

### Inclusion (2)

- Infants and one or both of their parents, born with a congenital defect and requiring major surgery during the neonatal period, including congenital heart disease.
- At the time of H-HOPE initiation, infants must be <48 weeks post-menstrual age (PMA), clinically stable (no vital sign instability during routine nursing care) on respiratory support < a nasal cannula at 2 liters per minute, and off all intravenous (IV) pain medications.

### Exclusion (6)

- Infants born at <34 weeks gestation,
- Infants born with congenital defects involving the nervous system (i.e., spina bifida, congenital hydrocephalus),
- Infants with genetic syndromes,
- Infants with a history of Extracorporeal Membrane Oxygenation,
- Infants with a history of mechanical ventilation lasting 30 or more days, or
- ... and 1 more (see full listing online)
