

Cochlear Implant Recipients: Comprehensive Longitudinal Evaluation

NCT07380269

Status	RECRUITING
Sponsor	Eye & ENT Hospital of Fudan University
Enrollment	300 participants

Key Eligibility Criteria

Inclusion (6)

- Patients with severe or greater hearing loss (e65 dB) scheduled to receive cochlear implant (CI) treatment.
- No restrictions on age or gender.
- Native language is Mandarin Chinese.
- The subject and/or their legal guardian must provide informed consent prior to the study, voluntarily sign a written informed consent form, and be willing to undergo follow-up assessments at the specified time points.
- Ability to communicate effectively with the researcher with the help of a guardian and comply with the researcher's requirements. For young children without mature language skills, ability to cooperate with the help of a guardian.
- ... and 1 more (see full listing online)

Exclusion (5)

- Presence of other severe diseases unsuitable for cochlear implantation surgery.
- Significant psychological problems or mood disorders (e.g., notable anxiety, depression, or behavioral disorders) that would preclude cooperation with training and follow-up.
- Neurological diseases (e.g., epilepsy, cerebral palsy) that may affect auditory processing ability.
- Concurrent participation in other interventional studies involving drugs or behavioral interventions that may affect auditory rehabilitation during the study period.
- Any other condition considered by the investigator to make the subject unsuitable for participation in this clinical study.
