

# Implementation of an Enhanced Recovery Pathway for Burr-hole Drainage in Patients With a Chronic Subdural Hematoma

NCT07421453

---

**Status** RECRUITING  
**Sponsor** Universitaire Ziekenhuizen KU Leuven  
**Enrollment** 150 participants

## Key Eligibility Criteria

---

### Inclusion (3)

- Age 18 years or older
- Existence of a chronic subdural hematoma requiring burr-hole drainage
- Written informed consent to participate in the study must be obtained from the subject. If the subject is not capable of self-consent, all efforts will be made to locate a legally acceptable representative to act on behalf of the subject. When the patient is considered capable to consent but physically unable to sign an informed consent form and a representative is not available an impartial witness can attend the informed consent process.

### Exclusion (2)

- Existence of an important underlying cerebral lesion (e.g. a vascular lesion, tumor)
- History of treatment (surgical or by middle meningeal artery embolization) of a same sided cSDH
