

Safety, Tolerability, and Immunogenicity of VAX-31 in Adults 50 Years With Prior Pneumococcal Vaccination

NCT07425392

Status	RECRUITING
Phase	Phase 3
Sponsor	Vaxcyte, Inc.
Enrollment	720 participants

Key Eligibility Criteria

Inclusion (9)

- Male or female ≥50 years of age (inclusive) at the time of randomization into the study.
- Previous receipt of a licensed pneumococcal vaccine or combination of licensed vaccines, with most recent vaccination ≥1 year prior to randomization; the exception is PCV21, which may have been received ≥6 months prior to randomization (confirmed).
- Able and willing to complete the informed consent process.
- Available for clinical follow-up through the last study visit.
- In good general health or with stable underlying chronic condition(s), as determined by medical history, oral temperature, physical examination, and clinical judgment of the Investigator (ongoing chronic conditions must be documented as stable per Investigator).

... and 4 more (see full listing online)

Exclusion (16)

- Previous invasive pneumococcal disease (IPD) or pneumococcal pneumonia (either confirmed or self-reported) at any age.
- Previous receipt of an investigational pneumococcal vaccine at any age.
- Receipt of any investigational product within 30 days prior to Day 1, currently participating in another interventional investigational study, or having plans to receive another investigational product(s) while on study.
- Receipt of any live vaccine within 30 days prior to Day 1, or receipt of any non-live (including inactivated) vaccine within 14 days prior to Day 1.
- Body temperature $\geq 38.0^{\circ}\text{C}$ ($\geq 100.4^{\circ}\text{F}$) or acute illness within 3 days prior to study vaccination (subject may be rescreened).

... and 11 more (see full listing online)
