

Study of TGM-312-SC01 in Healthy Participants and Adults With MASH

NCT07427680

Status	RECRUITING
Phase	Phase 1, Phase 2
Sponsor	Tangram Therapeutics Plc
Enrollment	99 participants

Key Eligibility Criteria

Inclusion (3)

- Adults aged 18 to 70 years who are able to provide written informed consent.
- Medically suitable for study participation based on protocol-defined assessments.
- For the disease cohort, participants with clinical features consistent with metabolic dysfunction-associated steatohepatitis, as defined in the protocol.

Exclusion (4)

- Clinically significant medical conditions, laboratory abnormalities, or other findings that, in the opinion of the investigator, could increase risk, interfere with study participation, or confound interpretation of study results.
- Recent participation in another investigational study.
- Use of medications that are prohibited by the protocol.
- Any other condition that would make the individual unsuitable for study participation as determined by the investigator.
