

Measurement of Airway Opening Index During Out-of-hospital Cardiac Arrest: The Lazarus AOI Trial.

NCT07438938

Status RECRUITING
Sponsor University Hospital, Ghent
Enrollment 150 participants

Key Eligibility Criteria

Inclusion (3)

- Adult (over 18 years old) patients with out-of-hospital cardiac arrest.
- Patients undergoing cardiopulmonary resuscitation (CPR).
- Patients who were intubated and had available capnogram recordings immediately after intubation.

Exclusion (3)

- Patients that were not intubated
- Patients that did not receive CPR following intubation
- Cases with a technical challenge with the ETCO₂ measurement (i.e., issues with waveform data of the capnogram).
