

Star Matrix vs Autogenous Graft for Gingival Augmentation: Split-Mouth RCT

NCT07440303

Status	RECRUITING
Phase	Not Applicable
Sponsor	Harvard Medical School (HMS and HSDM)
Enrollment	12 participants

Key Eligibility Criteria

Inclusion (4)

- Adults 20 - 80 years old who need gingival augmentation on both sides of the lower jaw.
- Able and willing to sign the consent form, follow study instructions and return for all visits
- Generally healthy (no significant illnesses or medicines that could interfere with healing).
- Demonstrates good daily oral hygiene (low plaque levels at baseline).

Exclusion (13)

- Does not meet any of the inclusion points or is unlikely to follow the schedule
- Previous gingival graft at the study site that failed
- Needs a root-coverage (recession-repair) procedure instead of simple width augmentation
- Active, untreated gum disease, cavities, infection, or chronic inflammation near the study teeth
- Used cigarettes, e-cigarettes, or other nicotine products within 3 weeks
- ... and 8 more (see full listing online)
