

Study of Pathogenic Mechanisms and Identification of Novel Autoantibodies in Autoimmune Encephalitis

NCT07477015

Status RECRUITING
Sponsor Fondazione Policlinico Universitario Agostino Gemelli IRCCS
Enrollment 20 participants

Key Eligibility Criteria

Inclusion (5)

- Patients > 18 years of age
- Patients able to provide informed consent
- For the patient group: patients diagnosed with autoimmune encephalitis associated with anti-NMDAR, GABABR, AMPAR, LGI-1, DNER antibodies, seronegative autoimmune encephalitis, or Susac syndrome, without other concomitant autoimmune diseases
- For the control group: patients without a diagnosis of autoimmune encephalitis associated with anti-NMDAR, GABABR, AMPAR, LGI-1, DNER antibodies, seronegative autoimmune encephalitis, or Susac syndrome
- For the control group: patients with other neurological disorders in whom the presence of antibodies against neuronal antigens has been excluded

Exclusion (2)

- Patients < 18 years of age
- Deceased patients
