

# Influence of Vertical Implant Position on Marginal Bone Loss in Cases With Thin Phenotype

NCT07483086

---

Status	RECRUITING
Phase	Not Applicable
Sponsor	Cairo University
Enrollment	30 participants

## Key Eligibility Criteria

---

### Inclusion (11)

- Patients with single missing upper anterior or premolar teeth
- Patients with minimum buccolingual width of 6 mm and mesiodistal width of 6 mm
- Patients with thin soft tissue phenotype
- Patients with healthy systemic conditions.
- Patients older than 18 years.

... and 6 more (see full listing online)

### Exclusion (9)

- Patients with inadequate bone volume and/ or quality
- Patients with local root remnants
- Patients with inadequate wound healing
- Patients with signs of acute infection related to the area of interest.
- Patients with habits that may jeopardize the implant longevity and affect the results of the study such as parafunctional habits (Lobbezoo et al., 2006).

... and 4 more (see full listing online)
