

taVNS for Breast Cancer Pain and Symptom Management

NCT07500012

Status	RECRUITING
Phase	Not Applicable
Sponsor	Florida State University
Enrollment	40 participants

Key Eligibility Criteria

Inclusion (8)

- are aged 18-79 years older;
 - have histologically confirmed Stage 0, I, II, or III breast cancer;
 - had completed their primary cancer treatment (surgery, radiotherapy, chemotherapy) and are currently on a stable survivorship care plan (e.g., endocrine therapy, supportive care), with no major treatment changes expected during the study;
 - have experienced pain with a severity of 4 or greater out of 10 for at least ten days in the last month;
 - are committed to maintaining the current treatment plan (e.g., endocrine therapy, supportive care) during the study;
- ... and 3 more (see full listing online)

Exclusion (11)

- have metastatic breast cancer (Stage IV);
 - have a current diagnosis of another active cancer;
 - have a history of significant cardiac conditions, such as bradycardia, arrhythmia, recent myocardial infarction, or heart failure;
 - have been diagnosed with a severe psychiatric illness (e.g., schizophrenia, bipolar I disorder with active psychosis) that could interfere with adherence to study procedures;
 - have active inflammatory or malabsorptive gastrointestinal disorders (e.g., Crohn's disease, ulcerative colitis, celiac disease) that could confound gut microbiota results;
- ... and 6 more (see full listing online)
